J. Qual. Clin. Practice (1996) **16**, 239–242

Subject index

abdominal pain; an analysis of child admissions 151
abdominal surgery; American Society of Anaethesiologists score and age as predictors of adverse events after 103
ACHS *see* Australian Council on Healthcare Standards
acute myocardial infarction; efficiency of thrombolytic therapy and quality assurance 49
admissions; of children with acute abdominal pain 151
age
  as a clinical indicator of adverse events after abdominal surgery 103
  as a predictor of outcome in an acute care teaching hospital 203
AHTAC *see* Australian Health Technology Advisory Committee
allied health outpatient services; access to and availability of at a public hospital as assessed by general practitioners 185
anastomotic leak; as a clinical indicator for colorectal surgery 31, (Comment) 37
appendicitis; in children admitted with acute abdominal pain 151
asthma; the use of continuous quality improvement methods to implement management guidelines 87
Asthma Health Outcomes Council; and asthma management guidelines 87
Australian Association for Quality in Health Care; the role of 175
Australian Council on Healthcare Standards
  accredited health-care facilities 231
  clinical indicators in surgery developed by 183
Australian Health Technology Advisory Committee; providing advice on technology based health-care services 131

book reviews 119, 177, 227

care quality; data linkage as a means of focussing on 39
children; an analysis of those admitted with acute abdominal pain 151
clinical indicators
  American Society of Anaethesiologists score and age as predictors of adverse events after abdominal surgery 103
  and application of Royal Australian and New Zealand College of Psychiatrists guidelines for psychotropic drug use 19
  in colorectal surgery 31, (Comment) 37, (Reply) 229
  in surgery developed by the Australian Council on Healthcare Standards and the Royal Australasian College of Surgeons 183
client satisfaction; the use of the Model of Service Quality to improve 215
clinical outcome
  a methodology for measuring in an acute care teaching hospital 203
  of same day surgery and patient satisfaction assessed by questionnaire 165
  the effects of patients with serious conditions discharging themselves 157
clinical path methodology; as a tool to manage patient care 109
colorectal surgery; clinical indicators in 31, (Comment) 37, (Reply) 229
comorbidity; as a predictor of outcome in an acute care teaching hospital 203
consultation; clients' satisfaction with 215
continuous quality improvement; using methods to implement management guidelines in asthma 87

data linkage; as a means of focussing on quality of hospital care 39
day surgery; and patient satisfaction as assessed by questionnaire 165
diagnostic services; and health technology assessment 131
disease severity; as a predictor of outcome in an acute care teaching hospital 203
drugs, psychotropic; Royal Australian and New Zealand College of Psychiatrists guidelines for use 19

editorial 1, 3, 67, 121, 181
evaluation; of asthma interventions and asthma management guidelines 87

gastrointestinal haemorrhage; assessing risk-adjusted outcomes following 203
gene therapy; and health technology assessment issues 131
general practice
clients' satisfaction with 215
Model of Service Quality used to improve design of 215
general practitioners
perceptions of surgical waiting times 195
survey to investigate access to and availability of clinical allied health outpatient services 185

haemorrhage, gastrointestinal; assessing risk-adjusted outcomes following 203
health care; management, planning, evaluation and outcome 5, (Comment) 17
health outcomes initiative; implementation of 5, (Comment) 17
health policy; the impact of health technology assessment on 123
health services
planning, development and management of quality programs for rural 145
research and outcome 5, (Comment) 17
health technology
assessment in Australia and other countries 123
assessment issues relating to laparoscopic services, molecular biology and gene therapy, radiation oncology, telemedicine and magnetic resonance imaging, and ultrasound 131
international assessment meetings 61
role of assessment in Australian health care and its definition 131
heart failure; assessing risk-adjusted outcomes following 203
hospitals
access to and availability of clinical allied public health serivces as assessed by general practitioners 185
acute care teaching, a methodology for measuring clinical outcomes in 203
patients leaving against medical advice 157

infection; as a clinical indicator for colorectal surgery 31, (Comment) 37
inpatients; leaving hospital against medical advice 157
international health technology assessment meetings 61
International Network of Agencies for Health Technology Assessment
bone density measurement technologies 61
health technology assessment in Australia 123
International Society of Technology Assessment in Health Care; value of screening discussed at the Eleventh Annual Meeting 61

laparoscopic services; and health technology assessment issues 131

magnetic resonance imaging; and health technology assessment issues 131
management
guidelines for asthma and the use of continuous quality improvement methods in the implementation of 87
of patient care using clinical path methodology 109
Model of Service Quality; its use to improve general practice design and client satisfaction 215
molecular biology; and health technology assessment issues 131
morbidity; and mortality soon after discharge from hospital 39
mortality
as a clinical indicator for colorectal surgery 31, (Comment) 37
soon after discharge from hospital and its relationship to morbidity 39
myocardial infarction
and quality assurance 49
assessing risk-adjusted outcomes following 203
efficacy of delivering thrombolytic therapy to patients with 49

National Confidentiality Enquiry into Perioperative Deaths 65
non-specific abdominal pain; as a diagnosis for children admitted with acute abdominal pain 151

notices 66, 180

outcome
and asthma mangement guidelines 87
and effects of patients with serious conditions discharging themselves 157
and health-care evaluation, management and planning 5, (Comment) 17
and health services research 5, (Comment) 17
and the limitations of patient satisfaction and quality of life assessment 75
as methodology for measuring in an acute care teaching hospital 203
different approaches to the assessment of 75
measures of 5, (Comment) 17, 75
of same day surgery and patient satisfaction assessed by questionnaire 165
outcomes initiative; implementation of 5, (Comment) 17
outpatient services; access to and availability of as assessed by general practitioners 185

patient care
leaving hospital against medical advice 157
using clinical path methodology for the management of 109
patient satisfaction
limitations of research into an outcome assessment of 75
with general practice consultation 215
with same day surgery assessed by questionnaire 165
policy making; the impact of health technology assessment on 123
prostate surgery; quality of life of patients waiting for 69
psychotropic drugs; Royal Australian and New Zealand College of Psychiatrists guidelines for use 19

quality; of general practice service 215
quality assurance
and application of Royal Australian and New Zealand College of Psychiatrists guidelines for psychotropic drug use 19
in the treatment of acute myocardial infarction 49
quality audit; of children admitted with acute abdominal pain 151
quality improvement
patient satisfaction with same day surgery assessed by questionnaire 165
the use of asthma management guidelines as a basis for 87
quality of care
and the limitations of patient satisfaction assessment 75
data linkage as a means of focussing on 39
quality of life
the limitations of research into in outcome assessment 75
of patients waiting for prostate surgery 69
quality programs
difficulties in the implementation of for rural health services 145
planning, development and management in relation to rural health services 145

RACS *see* Royal Australasian College of Surgeons
radiation oncology; and health technology assessment issues 131
RANZCP *see* Royal Australian and New Zealand College of Psychiatrists
record linkage; as a means of focussing on quality of hospital care 39
renal failure; assessing risk-adjusted outcomes following 203
resource utilization; American Society of Anaethesiologists score and age as an indicator of 103
risk-adjusted outcome; assessment following renal failure, gastrointestinal haemorrhage, stroke, myocardial infarction and heart failure 203
Royal Australian and New Zealand College of Psychiatrists; guidelines for psychotropic drug use and applications to hospital inpatients 19
Royal Australasian College of Surgeons; clinical indicators in surgery developed by 183
rural health services
and the planning, development and management of quality programs 145
difficulties in the implementation of quality programs for 145

same day surgery; patient satisfaction assessed by questionnaire 165
screening; value debated at the International Society of Technology Assessment in Health Care Eleventh Annual Meeting 61
stroke; assessing risk-adjusted outcomes following 203
surgeon; surgical waiting times in relation to choice of 195
surgery
  abdominal, American Society of Anaethesiologists score and age as predictors of adverse events after 103
  colorectal, clinical indicators in 31, (Comment) 37, (Reply) 229
  in children admitted with acute abdominal pain 151
  prostate, quality of life of patients waiting for 69
  limitations of patient satisfaction assessment 75
  same day, patient satisfaction assessed by questionnaire 165
surgical waiting times; general practitioners perceptions of 195

technology, health
  assessment of in Australia and other countries 123
  the role of assessment in Australian health care and a definition of 131
telemedicine; and health technology assessment issues 131
thrombolytic therapy; its efficiency as a treatment for acute myocardial infarction 49
transurethral resection of the prostate; quality of life of patients waiting for 69

ultrasound; and health technology assessment issues 131
urinary symptoms; of patients waiting for prostate surgery 69

variances
  in clinical path methodology, types of in a cardiac unit 109
  managing and the process of documenting in clinical path methodology 109

waiting times; general practitioners perceptions of 195
